SUBJECT INDEX
VOLUME 22

Abbott Quantum II yeast identification system
  compared with API 20C system, 442
Achromobacter xylosoxidans
  meningitis, 470
Acid-fast bacilli
  differentiation of *M. tuberculosis*
    gas-liquid chromatography, 761
    thin-layer chromatography, 761
Acquired immune deficiency syndrome
  human T-cell lymphotropic virus
    detection, 908
    quantitation, 908
  mycobacteremia, 543
Acridine orange stain
  bacteriuria, 176
  comparative studies, 176
Actinobacillus actinomycetemcomitans
  bacteriolysis, 629
  differentiation from *H. aphrophilus*, 629
Actinobacillus-Haemophilus-Pasteurella group
  differentiation among organisms, 629
Adenovirus
  antigens, 757
  293 cells, 205
  comparative studies, 757
  diarrhea, 934
  DNA restriction enzyme, 95
  dot-blot hybridization test, 934
  enzyme-linked immunosorbent assays, 757
  immunofluorescence assays, 757
  neutralization, 95
  nonfastidious species, 205
  phenol extraction, 934
  restriction enzyme analysis, 934
  types 40 and 41, 934
  typing, 95
Adhesins
  E. coli
    DNA probes, 425
Aeromonas hydrophila
  isolation medium
    comparative studies, 888
Aeromonas sobria
  cephalothin susceptibility, 854
Aeromonas spp.
  biotyping, 48
  cephalothin susceptibility, 854
  clinical features, 48
  detection on agars, 478
  gas-liquid chromatographic analysis
    fatty acid methyl esters, 1061
  invasiveness, 48
  virulence factors, 48
Agar
  comparative studies, 959, 1011
  detection of *Aeromonas* and *Yersinia* spp.
    cefsulodin-Irgasan-novobiocin, 478
    inositol-bile salts-brilliant green, 478
  MacConkey, 620
  MacConkey-sorbitol, 620
  mannitol salt with oxacillin
    methicillin-resistant *S. aureus* screening, 501
  Middlebrook 7H10
    comparative studies, 884
    M. haemophilus, 884
  Mueller-Hinton
    comparison with Micro-Media System (Fox Panel) for susceptibility testing, 387
    comparison with MS-2 and Sceptor systems for *Pseudomonas* susceptibility testing, 465
    methicillin-resistant *S. aureus* screening, 886
    Pseudomonas susceptibility testing, 465
  Mueller-Hinton, blood enriched
    false susceptibility of enterococci to aminoglycosides, 369
  Mycotrim-GU
    comparative studies, 789
  Neisseria spp. differentiation
    Mueller-Hinton, 731
    tryptic soy, 731
  oral bacteria, 959
  taurocholate-tellurite-gelatin, 1011
  Trypticase, 959
  Wagatsuma
    comparative studies, 868
    V. parahaemolyticus Kanagawa phenomenon, 868
Agar disk diffusion
  compared with Autobac system for detection of methicillin-resistant *S. aureus*, 467
Agarose-L agar overlay technique
  cell cultures, 897
  Salmonella spp., 897
  Shigella spp., 897
Agglutination
  B. vulgatus serogrouping, 56
Agrobacterium sp.
  antibodies, 683
  human infection, 683
  septicemia, 683
American MicroScan Dry and Frozen Microdilution Trays
  identification of organisms and susceptibility testing, 495
Amikacin
  comparative studies, 699
  latex agglutination inhibition, 699
  Macrovue card test, 699
  radioimmunoassays, 699
Amine volatilization test
  comparative studies, 686
  G. vaginalis, 686
Aminoglycosides
  enterococcal susceptibility, 369
Anaerobic bacteria
  AN-Ident, 32
  API 20A, 32
  identification
    comparative studies, 32, 980
  meningitis, 325
  PRAS II, 32
  RapID-ANA, 32, 980
  susceptibility testing, 882
Analytical Profile Index, API 20E
  supplementary tests, 1063
AN-Ident system
  anaerobic bacteria, 32, 52
  comparative studies, 32, 52
Antibiotyping
  B. gingivalis, 1020
  oral microorganisms, 1020
Antibodies
Agrobacterium sp.
  human infection, 683
anticomplement immunofluorescence, 1014
atopic dermatitis
  correlation with *S. aureus* counts, 452
B. abortus, 44
human calcivirus, 519
C. coli, 134
cerebrospinal fluid, 651
C. jejuni, 134
Colorado tick fever virus, 84
comparative studies, 641, 1014
complement fixation, 582, 945, 973, 1014
C. trachomatis, 609
cytomegalovirus, 68
  comparative studies, 1014
cytotoxin neutralizing, 968
detection
  comparative studies, 582
enzyme immunoassays, 566, 637, 1014
enzyme immunoassays, antibody capture, 740
enzyme-linked immunosorbent assays, 582, 808, 973
F. tularensis, 973
Haemophilus taxon "minor group," 945
hantavirus, 940
hemagglutination assays, 662
hepatitis B core antigens, 637
herpes simplex virus, 748, 870
herpes simplex virus type 2, 641
herpes zoster virus, 505
H. pleuropneumoniae, 945
immunodot assays, 641
immunofluorescence, 748, 870
  comparative studies, 877
  indirect, 582, 1014
  influenza A virus, 877
indirect hemagglutination, 1014
influenza virus, 259
Inoue-Melnick virus, 651
LaCrosse virus, 740
latex agglutination, 1014
L. interrogans serovar *hardjo* IgM, 539
measles, 505
meningococcal, 136
monoclonal, 596, 609, 748, 870
  comparative studies, 877
  ELISA compared with immunofluorescence assay for detection of feline infectious peritonitis virus antibodies, 395
  enzyme-linked immunosorbent assays, 119, 609
  hepatitis virus, 119
  immunofluorescence, 609
  influenza A virus, 877
  parainfluenza 3 virus, 535
  T. pallidum, 241
multiple sclerosis, 651
Norwalk virus, 274
Ockelbo disease, 566
P. carinii
  indirect immunofluorescence, 1058
pneumococcal C polysaccharide, 808
Pogosta disease, 566
polyclonal, 596
polyclonal antisera
  comparative studies, 877

influenza A virus, 877
polymeric IgA, 505
acute Q fever, 484
radioimmunoassay blocking test, 519
rat rotavirus-like agent
biotin labeled, 726
respiratory syncytial virus, 1050
rubella, 505
S. aureus cell wall, 547
serum-dilution plaque-reduction neutralization, 582
Sindbis virus, 566
S. typhi, 662
T. gondii, 645
toxoplasmosis, 645
tube agglutination, 973
tularemia, 973
varicella, 505
vesicular stomatitis virus, 582
western equine encephalitis virus, 566
Antigens
adenovirus, 757
biotin labeled, 637
bovine astrovirus, 668
cell cultures, 1071
Chagas' disease
T. cruzi and rat heart antigens, 438
circulating immune complexes, 645
comparative studies, 693, 757, 1066
complement fixation, 768, 1066
counterimmunoelectrophoresis, 754
cryptococcal, 856
cytomegalovirus, 768
cytoplasmic
paracoccidioidomycosis, 39
detection
comparative studies, 553
counterimmunoelectrophoresis, 553
latex agglutination, 553
E. coli, 620, 626, 637
enteritis-associated serotypes
Y. enterocolitica, 1035
enterococci, 677
enterotoxigenic *E. coli*, 705
enzyme extraction, 677
enzyme immunoassays, 637, 693, 726
enzyme-linked immunosorbent assays, 645, 757, 782, 808, 1071
F. tularensis vaccine, 527
glycolipid, phenolic
M. leprae, 680
glycoprotein, 641
H. capsulatum, 1066
heat-labile, 558
heat-labile enterotoxins, 626
heat-stable, 558
C. immitis, 515
heat-stable enterotoxins, 626
hemorrhagic colitis, 620
hepatitis B core, 637
herpes simplex virus type 2, 641
H. influenzae type b, 754
human T-cell lymphotropic virus, 908
immunofluorescence assays, 668, 757
indirect fluorescence, 782
indirect hemagglutination assays, 768
indirect immunofluorescence, 908
influenza A virus, 757
influenza B virus, 757
Lancefield group
beta-hemolytic streptococci, 772
Lancefield serogrouping, 677
latex agglutination, 693, 856
L. monocytogenes, 677
M. leprae, 680
neutralization assays, 668
Ortho detection kit, 782
P. aeruginosa, 229
parainfluenza type 3 virus, 535, 757
P. carinii
counterimmunoelectrophoresis, 1058
pneumococcal
pneumonia, 553
C polysaccharide, 808
rat rotavirus-like agent, 726
respiratory syncytial virus, 757, 782, 1071
rotavirus gastroenteritis, 693
Salmonella polymeric flagellins, 347
S. aureus, 229
S. faecalis, 677
S. pneumoniae type 6, 754
streptococcal
Culturette 10-Minute Strep ID kit, 145
Detect-A-Strep kit, 145
streptococci, 677
synthesis
DNA probes, 600
S. typhi, 600
T. gondii, 645
tube precipitin
C. immitis, 515
yeast phase, 1066
Y. enterocolitica
enteritis-associated serotypes, 1035
Antihemolysin test
comparative studies, 296
measles virus, 296
Antimicrobial agents
β-lactam
B. gingivalis antibiotyping, 1020
nucleic acid synthesis inhibitors
B. gingivalis antibiotyping, 1020
protein synthesis inhibitors
B. gingivalis antibiotyping, 1020
API An-Ident system
oral gram-negative bacilli, 333
API 20A system
anaerobic bacteria, 52
comparative studies, 52
API 20C system
comparative studies, 216
API 20E
comparative studies, 778
Vibrionaceae identification, 778
API 20E Analytical Profile Index
supplementary tests
comparative studies, 1063
API NeIdent system
Neisseria spp., 101
API Rapid E
comparative studies, 778
Vibrionaceae identification, 778
API Rapid NFT
comparative studies, 778
Vibrionaceae identification, 778
API 20 Strep system
comparative studies, 1030
streptococcus biotyping, 1030
API ZYM system
oral gram-negative bacilli, 333
Apophysomyces elegans
zygomycosis, 522
Attenuation phenotype
influenza A virus, 719
Autobac Multi-Test System
comparative studies, 822
methicillin-resistant *S. aureus*, 822
Autobac system
compared with agar disk method
detection of methicillin-resistant *S. aureus*, 467
detection of methicillin-resistant *S. aureus*, 467
AutoMicrobic system
bacteriuria, 62, 176
comparative studies, 62, 176
AutoMicrobic System Gram-Negative General Susceptibility-Plus Card
susceptibility testing, 355
autoSCAN-4 system
gram-negative bacteria, 915

Bacitracin disk
with Streptocult for beta-hemolytic streptococci grouping, 497
BACTEC *Neisseria* Differentiation Kits
N. cinerea production of 14C-labeled gas, 416
BACTEC system
bacteremia, 225
comparative studies, 225, 841, 919, 951
H. influenzae, 225
L. pneumophila isolation, 422
M. avium complex, 841
Middlebrook 7H12 medium, 841
M. tuberculosis, 841, 919
mycobacteremia detection, 543
specimen volume, 292
yield, 292
Bacteremia
BACTEC system, 225
detection
Isolator 1.5 Microbial Tube, 674
modified lysis direct plating, 674
H. influenzae, 225
H. influenzae type b, 815
L. buccalis, 320
pneumococcal, 808
Bacterial identification
API 20E Analytical Profile Index, 1063
comparative studies, 1063
Bacterial pathogens
mode of growth, 924
osteomyelitis
growth mode, 924
Bacteriocins
P. cepacia susceptibility testing, 490
Bacteriolysis
differentiation among *Pasteurellaceae* organisms, 629
EDTA, 629
hen egg white lysozyme, 629
Bacteriophage typing
C. coli, 13
C. jejuni, 13
Bacteriuria
acridine orange stain, 176
AutoMicrobic system, 62, 176
Bac-T-Screen, 62
Gram stain, 176
Lumac bioluminescence method, 62
screening
bioluminescence assay, 531
Chemstrip 9, 531
leukocyte esterase-nitrite test, 531
Monolight centrifugation method, 531
Bacteroides endodontalis
characterization, 75

Bacteroides gingivalis
antibiotyping, 1020
Bacteroides gracilis
susceptibility testing, 799
Bacteroides ovatus
xylan fermentation, 125
Bacteroides spp.
black-pigmented
B. endodontalis, 75
differentiation from *Fusobacterium* spp.
β-glucosidase (esculinase) test, 435
Bacteroides thetaiotaomicron
xylan fermentation, 125
Bacteroides vulgatus
agglutination, 56
serogrouping, 56
Bac-T-Screen
bacteriuria, 62
comparative studies, 62
BHK suspension test
comparative studies, 250
dengue virus, 250
Bioassays
flucytosine, 157
human T-cell lymphotropic virus, 908
indirect immunofluorescence, 908
ketoconazole, 157
proliferation assay, 908
Bio-EnzaBead
comparative studies, 693
rotavirus gastroenteritis antigens, 693
BIOGRAM test system
comparative studies, 793
susceptibility testing, 793
Bioluminescence assay
bacteriuria screening, 531
Biotin-avidin immunoassay
Norwalk virus antibodies, 274
Biotyping
API 20 Strep system, 1030
B. gingivalis antibiotyping, 1020
carbohydrate fermentation, 955
C. jejuni, 326
E. coli, 955
motility tests, 955
ornithine decarboxylase, 955
penicillin-binding proteins, 1030
streptococci, nutritionally variant, 1030
Blood cultures
cross-contamination, 23
pseudobacteremia outbreak, 23
Borrelia burgdorferi
isolation from ticks (*Dermacentor variabilis*), 36
Lyme disease, 36
Bovine astrovirus
serotyping, 668
Bovine herpesvirus 1
DNA probes, 990
hybridization, 990
Bovine infections
interferon
antiviral effects, 912
Brain abscess
C. neoformans, 1068
Broth microdilution
comparative studies, 793
susceptibility testing, 793
Aeromonas spp., 854
Brucella abortus
antibodies, 44
complement fixation, 44
enzyme-linked immunosorbent assay, 44
Calcivirus, human
antibody testing
radioimmunoassay blocking test, 519
Campylobacter coli
antibiotic resistance
plasmids, 339
antibodies, 134
bacteriophage typing system, 13
lectins, 134
susceptibility testing, 510
Campylobacter jejuni
antibiotic resistance
